Education

Najot Ta'lim

Frontend Developer **November 2021 - May 2022**

Experience

Najot Ta'lim, Frontend Developer, Mentor — May 2022 - Present

- I have been working as a mentor to bootcam and standard groups in this training center.
- My job is to help students pass the application, work more with students who are lagging behind
- I can say that during this time I have worked with many students and I have developed the ability to learn and adapt.
- During this period, the training center achieved its highest level in terms of education quality. Over 90% of the students were successfully employed, reflecting the effectiveness of the mentoring and support provided.

Bu-agency, Frontend Developer — August 2022 - 2023

- I worked in this team as the main frontend developer, I also managed the frontend developers
- I mainly work on integrating back-end APIs, handling user registration, and implementing role-based access control in admin panels.
- Since joining the project, the efficiency has significantly improved,

Invan Soft, Frontend Developer — January 2025 - Present

- Revamped the supplier order acceptance and return sections, which previously suffered from performance issues and slow response times.
- Identified and eliminated excessive API calls across the project, significantly reducing server load and improving response times.
- Implemented real-time order tracking across multiple statuses using WebSocket technology, ensuring efficient and seamless user interaction.
